COMPUTER ENGINEER

[contact@utkueren.dev](mailto:contact@utkueren.dev)

## ABOUT

---

Computer Engineer with a strong focus on product development and product design, combining technical problem-solving with a design-driven mindset. Actively working on AI-based projects, with experience in designing, building, testing, and improving digital products.

## EMPLOYMENT

---

**DISMAS STUDIO** Remote / Full Time

Software Developer / Designer

11/2023 - NOW

- The software company I am a founding partner of in the KKTC implements its own projects / freelance projects.
- I worked in software development and project management for a project that controls smart home systems.
- I established business partnerships by communicating with different companies, developed a mobile app with React Native and worked on the user experience and interface design of the project.

**INTALE AI** Remote / Part Time

Software Developer / Designer

04/2024 - 08/2024

- I worked as a designer and developer on a project that produced personalized children's fairy tales supported by AI.
- I was also responsible for the design of the web application and wordpress landing page of project.
- I worked on integrating the API connections in a project that produced personalized AI-powered rap songs.

**JOTFORM** Remote / Part Time

UI Development Support Enginner

11/2022 - 06/2023

- My job description was to improve the UI side of jotform to be bug free.
- I mostly worked on responsiveness errors. In this process, I worked with Reactjs - CSS/SCSS.
- I improved the UI side design for new enterprise features with Figma designs within a limited time.

**JOTFORM** On-Site / Internship

UI Development Intern

08/2022 - 09/2022

- I developed a landing page and admin panel for Jotform during my internship.
- I conveyed my projects and experiences to the employees in the company with a presentation.
- I gained experience in this field by using flex and grid structures separately in my projects.
